## SKILLS

---

**Technical Skills** — C,C++ | LT Spice | Basic Microcontroller | Verilog | MATLAB | Kicad, **Soft Skills** — Adaptability | Effective Communication | Leadership | Time Management

## COURSES / CERTIFICATE

---

**IoT-Network Specialist Certificate Programme, Reliance foundation**

## PROJECTS

---

|                                                                                                                                                                                                                                                                                                                                                                                   |                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Sound Activated Smart Pet Door Controller</b><br>Developed Arduino Uno-based embedded system for pet room access via KY-038 sound sensor detecting cat meows, triggering SG90 servo for 8s door latch activation.                                                                                                                                                              | 12/2025 – 01/2025 |
| <b>Automatic Toll Booth system using Arduino and Ultrasonic sensors</b><br>Designed and Implemented an automated Miniature Toll Booth system using Arduino UNO Microcontroller, Servo motor and Ultrasonic sensors.                                                                                                                                                               | 11/2023 – 01/2024 |
| <b>IoT-Based Blood Bank Cold Storage Monitoring System</b><br>Developed an ESP32-based IoT system to monitor blood storage temperature and detect door access using a magnetic reed switch. Integrated a temperature sensor, LEDs, and a buzzer for real-time monitoring and alerts, with cloud connectivity and automated email notifications to ensure safe storage conditions. | 02/2026 – 04/2026 |

## INTERESTS

---

Painting | Culinary Arts | Classical Dancing | Event Planning

## CO-CURRICULARS

---

**Lazzerena**  
Organised the event during University's annual fest 2025
